FITTING

B - Dry Fit and Connect Installation

1. Site dimensions will be taken prior to installation, with particular attention being taken to the correct location of services.
2. We reserve the right to delay fitting if the kitchen area is not ready, or there are other trades working the area.

First Fix Stage

3. Fit all base, wall and tall units to previously prepared walls (by others)
4. Scribe and fit all base, tall and wall fillers
5. Noggin heights will be supplied where dry lined or cavity walls are applicable
6. Cut and fit all laminate and wooden worktops
7. Cut out for sink and hob (laminate and wooden worktops only)
8. Fit sink support panel for solid worktops and sink cut-out

Signature Date

5

IMPORTANT NOTICE – Please Read Our Standard Conditions Of Sale Overleaf Before Signing These documents. you should also read the schedule of goods and, if applicable, the scope of works within these documents before signing. if there is anything that you do not understand you should contact the branch manager for clarification. if these documents interpret your order with us correctly please sign each page and return one complete set to us within 7 days of the date printed at the top of this page.

Nicholas Anthony Limited Registered in England No. 1653754 VAT No. 386 7365 03
Registered Office 43-45 London Road, Lexden, Colchester, Essex CO3 5AJ

Nicholas Anthony.

Linton House, 164 Union Street, London, SE1 0LH
TEL: 020 7620 3636 / FAX: 020 7620 3637

Second Fix Stage

- 9. A template is made for all solid worktops prior to fitting, with the exception of steel worktops.
- 10. Approximately five working days after the worktop template has been taken, we will return to site to fit the worktops and sinks.
- 11. Templates can then be taken for the glass back-panels. Approximately 5 working days from that date the glass will be fitted.

Third Fix Stage

- 12. All electrical appliances, gas appliances, lights, sinks, taps and waste disposal units (where supplied) are fitted in the appropriate spaces and where applicable integrated doors fitted to them.
- 13. Connection to the adjacent supplies can only be made once the services have been tested and certified.
- 14. Once the kitchen is complete, it will be wrapped and protected and at this stage handed over to the contractor.
- 15. Our specification does include a general clean, but not a full and final clean.
- 16. No mastic will be applied to joints, except to the rear of the worktop and all base, tall and wall fillers.
- 17. It is not recommended to mastic the plinth and it not part of the installation price.

Fourth Stage - Testing And Commissioning

- 18. Once the services have been tested and certified, we will connect all appliances to the appropriate adjacent point.
- 19. Each connection and appliance will then be tested for function and reliability.
- 20. A test certificate will then be issued.

FITTING

B - Dry Fit and Connect Installation

1. Site dimensions will be taken prior to installation, with particular attention being taken to the correct location of services.
2. We reserve the right to delay fitting if the kitchen area is not ready, or there are other trades working the area.

First Fix Stage

3. Fit all base, wall and tall units to previously prepared walls (by others)
4. Scribe and fit all base, tall and wall fillers
5. Noggin heights will be supplied where dry lined or cavity walls are applicable
6. Cut and fit all laminate and wooden worktops
7. Cut out for sink and hob (laminate and wooden worktops only)
8. Fit sink support panel for solid worktops and sink cut-out

Second Fix Stage

9. A template is made for all solid worktops prior to fitting, with the exception of steel worktops.
10. Approximately five working days after the worktop template has been taken, we will return to site to fit the worktops and sinks.
11. Templates can then be taken for the glass back-panels. Approximately 5 working days from that date the glass will be fitted.

Third Fix Stage

12. All electrical appliances, gas appliances, lights, sinks, taps and waste disposal units (where supplied) are fitted in the appropriate spaces and where applicable integrated doors fitted to them.
13. Connection to the adjacent supplies can only be made once the services have been tested and certified.
14. Once the kitchen is complete, it will be wrapped and protected and at this stage handed over to the contractor.
15. Our specification does include a general clean, but not a full and final clean.
16. No mastic will be applied to joints, except to the rear of the worktop and all base, tall and wall fillers.
17. It is not recommended to mastic the plinth and it not part of the installation price.

TEL: 020 7620 3636 / FAX: 020 7620 3637

Fourth Stage - Testing And Commissioning

- 18. Once the services have been tested and certified, we will connect all appliances to the appropriate adjacent point.
- 19. Each connection and appliance will then be tested for function and reliability.
- 20. A test certificate will then be issued.
